

THE CHEEK CHRONICLE

MAY 2023

Celebrating our employees!

We recently began gifting deserving employees with tickets to the Reno Aces baseball games. It's important to Kyle that we recognize employees who share a positive attitude, hard work and dedication, and contribute to an atmosphere that encourages teamwork, integrity and excellence.

These two are great examples of how to be a great coworker! **Elias and Herminio** (top left) always have smiles on their faces and they work incredibly hard to serve the team each day.

The mindset, attitude, and actions of our team are what set us apart from the competition when it comes to performance as northern Nevada's premier concrete contractor.

With that in mind, we recently presented **Juan and Alex** (bottom left) with tickets to an Aces baseball game as recognition for their positive leadership, uplifting attitudes, and incredible work ethic while on the job this past month.

This is just the beginning of our giveaway. There are 40 more opportunities for your chance to receive tickets in the coming months!

Thank You!

FOR YOUR

Solid Work Ethic & Positive Attitude!

Monday, May 29th is a paid holiday in observance of Memorial Day.

Electrocution ranks sixth among causes of workplace fatalities in America. Nearly half of the deaths caused each year in the electrical trades occur in construction, according to the Bureau of Labor Statistics.

OSHA confirms that construction workers are most commonly killed by falls, blows or crushing from heavy objects, and electrocutions. So, how do we protect ourselves from this danger? We can start by pre-planning, inspecting and eliminating potential hazards.

Here are some safety tips:

- ◇ Check electrical cords for fraying or cracking. **Replace cords that may be damaged**, and don't overload electrical outlets.
- ◇ Remember extension cords are intended to be **temporary**; they

May is Electrical Safety Month.

Safety Starts with You.

#ElectricalSafetyMonth

Did you know that electrical hazards cause more than 300 deaths and 4,000 injuries each year among the U.S. workforce?

- are not intended as permanent wiring.
- ◇ Don't run cords under carpets or rugs and don't tack or nail cords to walls or floors.
- ◇ **NEVER** touch downed power lines!
- ◇ Watch for **overhead lines** every time you use a ladder, work on roofs, trees, or when maneuvering elevated loads.
- ◇ Know what's below before you dig. At least 2 days before starting any digging or excavating project, **call 811** to have underground utility lines, pipes, and cables marked for free.
- ◇ Avoid planting trees underneath power lines or near utility equipment.

- ◇ Remember, any electrical device used on a house wiring circuit can, under certain conditions, transmit a **fatal current**. While any amount of current over 10 milliamps (0.01 amp) can produce painful to severe shock, currents between 100 and 200 mA (0.1 to 0.2 amp) are lethal.
- ◇ **ALWAYS** make sure you have plan when working around electricity.

LET'S AVOID WORKPLACE COMPLACENCY THIS MONTH BY MAKING SURE THAT SAFETY IS TOP OF MIND WHILE PERFORMING ANY ELECTRICAL TASK!

MAY BIRTHDAYS

Steve Leonard	May 5
Rodolfo Navarro	May 9
Guillermo Cardenas	May 10
Luis Dominguez	May 12
Edgar Hernadez	May 18
Enrique Roch Rosas	May 28
Audon Sanchez Cruz	May 29
Thomas Schwartz	May 31
Fernando Lara	May 31

WORK ANNIVERSARIES

Miguel Fierros-Estrada	6 years
Hector Fierros-Estrada	6 years
Oscar Ongay Hernandez	4 years
Gabriel Padilla	1 year
Andres Silva	1 year
Aiden Lucia	1 year
Alma Cenciceros	1 year

Don't forget about our taco party at the Reno shop, May 5th at 2 p.m.
